

Dental implant practice kit: Usability study Queen Elizabeth Hospital, Birmingham – 7th November

**Are you a maxillofacial or dental surgeon with experience in dental implantation surgery?
Or are you training in dental implantation surgery?**

Are you interested to give your opinion on a new dental implantation practice kit?

We would like your feedback!

We are working with a company that has designed a dental implantation practice kit for dental surgeons to practice implantation procedures. We would really like you to try it as your views are key to adapting the kit to improve it for optimum use to clinicians benefit and improve the quality of care for patients.

What would we like you to do?

This would involve attending a 45 minute session which will include a demonstration of the device, and for you to try the device for yourself. You will then be asked to give feedback and make recommendations: we would like to understand what would work for you and your patients!

Who we are:

We are a project team based at Queen Elizabeth Hospital site of University Hospitals Birmingham NHS Foundation Trust. We support the development of new medical technologies and devices.

When and where will this take place?

On the **7th November** at the Queen Elizabeth Hospital (Heritage Building), Birmingham in a simulated theatre environment in a dedicated facility designed to test new medical devices.

If you want to register your interest and to book your time slot, please contact our team by
email: mdtec@uhb.nhs.uk or telephone: 0121 371 8524

Further questions:

Is this research?

This study is research – part of medical device development, but it is not a clinical trial.

Will I get paid?

We cannot offer reimbursement for time, however tea / coffee and biscuits are on us! We can also provide you with a certificate of participation.
